Special Offers and to leave a Review

Swelling and bruising are normal and can reside for several days post treatment. The skin may feel tender to touch.

Avoid Sunbeds, heat, sun exposure, sauna, steam rooms, hot showers and extreme cold for 2 weeks.

There may be itching, stinging, redness or warmth in the treatment area post treatment. This will last between a few hours to a couple of days.

Do not touch, massage, apply fake tan or make up to the areas that have been injected for 24 hours.

It is important to drink plenty of water to help the body remove the excess waste. We recommend 3 litres a day.

A healthy diet and light exercise should be maintained throughout the course of treatment.

For pain relief use paracetamol, no ibuprofen for 48 hours. Keep area covered 48 hours.

No excessive exercise 4/5 days - can slow walk.

In rare cases nodules, necrosis, abscesses, hematomas, or infection may occur. If you experience anything that concerns you please contact Madison immediately.
