Special Offers and to leave a Review

Due to the anaesthetic in the gel, you may feel numbness or tingling straight after the treatment, and have some moderate swelling, redness, bruising and tenderness over the area. Bruising can be visible initially, however it is usually more obvious the next day before fading over the next 14 days. A small minority of bruises can last 4-6 weeks.

For pain relief, paracetamol and a cold clean compress can be applied. Do NOT apply ice.

Do not touch, massage or apply make up to the areas that have been injected for 24 hours.

The product is movable for 6 hours after treatment.

Avoid any kissing, travel, exercise, alcohol and cigarettes for 24 hours.

Avoid drinking from old cups/bottles.

Avoid Sunbeds, heat, sun exposure ,sauna, steam rooms and hot showers for 2 weeks.

You may apply a NEW lip balm after 12 hours.

Facial contouring ie; jaw, cheeks or chin. Sleep on your back for 2 weeks to prevent unevenness.

Look out for any discolouration that is abnormal for you; blue, grey, white changes to the skin. Please call me immediately if you see this as this may indicate a need for medical assistance.
